TCP/IP

总分： 3

---

1. Which of the following is an example of a network layer (layer 3) protocol?
   1/1 分

   ○ Ethernet

   ○ UDP

   ⊙ IP

   ○ TCP

   > ✓ 正确
   > Nice job! IP, or Internet Protocol, is the most common network layer protocol.

2. What's the difference between a client and a server?
   1/1 分

   ○ Clients and servers are different names for the same thing.

   ⊙ A client requests data, and a server responds to that request.

   ○ Clients operate on the data link layer, and servers operate on the network layer.

   ○ A server requests data, and a client responds to that request.

   > ✓ 正确
   > Wohoo! You're correct.

3. Which of the following are examples of layers of our five-layer network model? Check all that apply.
   1/1 分

   ☑ The physical layer

   > ✓ 正确
   > Great work!

   ☐ The presentation layer

   ☑ The application layer

   > ✓ 正确
   > Great work!

   ☑ The transport layer

✓ **正确**
Great work!

✓ **正确**
Great work!
